School Management System

Main Web   **Super Admin**   **Teacher Panel**   **Student Panel**   **Parent Panel**

Project OverView:

Catering to the needs of every learning institution, our School Management System is the centralized system for smooth functionality in all aspects. It helps management, faculty, students and parents equally to get informed on time and also enables mass communication between users regarding events, decisions, announcements and daily activities. Alongside it holds dashboards for every entity of school, let it be transportation, library management or inventory. This a vast and comprehensive software which allows the management to hold the school records at a place together.

Features:

- Ability to create multiple UserRoll
- Daily Attendance
